NuSDaS: Numerical Prediction Standard Data-set System

Eizi TOYODA[1]

[1] JMA NPD

NuSDaS(Numerical Prediction Standard Data-set System) is usded in the operational numerical weather prediction in Japan Meteorological Agency. NuSDaS is designed to operate daily numerical weather prediction systematically and efficiently. NuSDaS is applied to UNIX system and treate 2-dimensional GPV as a one record in spatial, time, element, description and so on. Many users can easily read the target data.
