

## Initiative of Science Council of Japan on master planning of large scale scientific researches and facilities

NAKAJIMA, Teruyuki<sup>1\*</sup>

<sup>1</sup>Atmosphere and Ocean Research Institute, University of Tokyo

Science Council of Japan started since 2010 an initiative of establishing a master plan of large scale science researches and facilities. This initiative has been born to overcome the recent difficult situation of launching large scale scientific researches and facilities with 10 billion yen budget. I like to overview the master plan and several issues regarding the planning.
