

Boring survey across the active structure along Yufutsu coast

KOMATSUBARA, Junko^{1*}, KOMATSUBARA, Taku¹

¹AIST

We will give presentation on the result of boring surveys along the Yufutsu coast across the possible active fault, which has been expected from the linear elevation gap in bathymetry.

Keywords: Yufutsu, Tomakomai, boring survey, latest Pleistocene to Holocene incised valley fill, active structure, coastal area
