

Survey of educational study on disaster prevention

YAMADA, Nobuyuki^{1*} ; HAYASHI, Shinsaku¹

¹Fukuoka University of Education

The consciousness of importance and need of the disaster prevention education for the natural disaster is increasing more. In this study, we tried that we grasped the actual situation of the study on previous disaster prevention education through compiling of research paper title by the some keywords. We set that the keywords are the causing phenomenon of the disasters, e.g. earthquake, tsunami, volcano, typhoon, and directly expression word of disaster prevention education, safety education. Our result shows these selected words are not so many used in the title of previous research papers. Although this procedure has an inadequacy, we can understand a tendency and the actual situation about the methods and contents of the disaster mitigation education.

Keywords: Disaster mitigation education, Title of reserch paper
