

Diversity of "freezing" and its application to activities in the Tokachi-Shikaoi Geopark

ONISHI, Jun^{1*} ; SAWADA, Yuki²

¹Tokachi shikaoi geopark Promotion conference, ²Fukuyama city university

" Freezing " is one of the main themes of Tokachi-Shikaoi Geopark. It appears in many different features: periglacial phenomena and landform, ecology, and life-style of residents in this region. We show some examples of geomorphic features related to cold climate, and activities of residents adapting to the " freezing " winter and even using ice to build hot spa, ice bar and other activities on " freezing " Lake Shikaribetsu. Our poster will show introduction to the world of freezing.

Keywords: tokachi shikaoi, geopark, freezing
