

Earth Science Database of Hadean Era

Yoshiyuki Koide [1]

[1] Kanagawa Pref. Mus. Nat. Hist.

Hadean era is between 4.56 to 3.8 Ga (Ga = billion years). There is rare geological evidence at Hadean era. I compile systematically information of research fields related to Hadean. I construct database of Earth's rocks, minerals and formations, of meteorites and other planets, and of planetary formation model by computer simulation.
