

## Reasoning and ethics for isolation of radioactive wastes viewed from the Earth and Life evolution

# Mineo Kumazawa [1]

[1] Tono, JNC

The reasoning and ethics on the relevant subject are discussed from a long ranged view derived from the study of Earth and life history. I noted the necessity of more debate on "concept of geological disposal" to be robust enough to achieve the safe isolation of the high level radioactive wastes for the succession of our Earth Life.
