

Eclogites in Japan

Akira Takasu [1]

[1] Dept. Geoscience, Shimane Univ.

6th International Eclogite Conference will be held in Japan in 2001. According to a preliminary proposal the Conference consists mainly of scientific sessions and a field excursion to eclogite localities in the Sambagawa metamorphic belt in Shikoku. Eclogite researchers in Japan should give their presentation on eclogite studies at the Conference. I am reviewing the eclogites and eclogites in Japan from the viewpoints of metamorphic petrology, geochronology, geochemistry, structural geology and tectonics.
