

Invitation to Kitchen Earth Science

Kei Kurita[1], Tohru Watanabe[2]

[1] Dep. Earth & Planet. Phys., Univ. of Tokyo, [2] Dept. Earth Sciences, Toyama Univ.

In the poster we would like to explain why we set up this session. So-called analog model experiment, once flourished in 1950s,60s, seems to have lost its scientific role in earth science. Extensive growth of computer simulation has expelled the analog experiments. Is there still a room for the analog experient in the present-day situations of the earth scinece? This is our pricipal motivation to set up this session. We would like to explore the present-day role
