

## Measurements of borehole thermal gradient on High Sensitivity Seismograph Network Japan (2)

# Takumi Matsumoto[1]

[1] Earthquake Research Center, NIED

National Research Institute for Earth Science and Disaster Prevention (NIED) deploys the high sensitivity seismograph(Hi-net) across the all of Japan, as part of the activities of the Headquarters for Earthquake Research Promotion.  
The across the all of Japan, as part of the activities of the Headquarters for Earthquake Research Promotion.  
The thermal gradients of these borehole were observed.
