## Measurements of borehole thermal gradient on High Sensitivity Seismograph Network Japan (3)

# Takumi Matsumoto[1]

[1] Earthquake Research Center, NIED

<http://www.bosai.go.jp>

National Research Institute for Earth Science and Disaster Prevention (NIED) deploys the high sensitivity seismograph(Hi-net) across the all of Japan, as part of the activities of the Headquarters for Earthquake Research Promotion. The thermal gradients of these borehole were observed.

# 熱流量分布と地震下限分布

震源深さ誤差 2 km以下かつD90 (90%)
