

# Grid Distribution of Earthquake-Days' Ratio of Lightning-Days in and near Japan by use of LIS data aboard TRMM

# Masaki Ichihashi[1]

[1] JNC

The result of the statistical analysis of LIS data aboard TRMM is shown as follows:

The number of grids (1 deg(latitude),1 deg(longitude),depth(step 30km)) with higher ratios of Grid Earthquake-Days of Lightning-Days in and near Japan are more than the number of grids with lower ratios.
