On behalf of becoming more multifaceted life style of meeting participants, we have been requesting that the organizing committee arrange for childcare facilities to be made available for the duration of the conference since 1998 annual meeting . We anticipate that some prospective attendees will be unable to attend unless their children can be looked after. We have been recommending several specifications in detail regarding childcare facilities, based on a similar service provided annually at the AGU Fall Meeting and Astronomical Society of Japan. We will introduce 8-year activities of childcares in the annual meeting and discuss future prospects.
