On-site day care is opened in the fall meeting of the Seismological Society of Japan (SSJ) every year. In this report, we would like to introduce the day care in the SSJ Fall Meeting 2004 and support from the SSJ.

The day care was opened in the last Fall Meeting held in Fukuoka from October 9 to 11 in 2004. The SSJ supported us very much. We could receive day care fee grant. It was stuck to 1 hour 1 child; the day care fee was 500 yen by using the grant. The grant was for who have wishes. Users appreciate the SSJ for supporting the day care in the situation of financially tough.

This support isn't only for the female members but also for male members. Furthermore, it will be a hope for young researchers who don't have a child yet, too. It can activate the meeting and society of seismology. We would like to share such point of view with the SSJ and maintain the on-site day care in the SSJ Fall Meeting from now on.
