

# Eruptive activities of the Kirishima volcano during the Meiji-Taisho Period drawn in the pictures

# Ryusuke Imura[1]

[1] Earth and Environmental Sci., Kagoshima Univ.

I tried to reconstruction of the eruptive activities of kirishima Volcano from the late 1800s to the early 1900s based on some pictures. The eruption plume from Ohachi volcano can be seen in some paintings. So far, I have seen that the eruptive activity of Ohachi volcano in those days is very smilar to that of present-day activity of the Sakurajima Volcano.
