## Flares and CMEs associated with the magnetic storm on 2005 August 24

# Ayumi Asai[1]; Takako Ishii[2]

[1] Nobeyama Solar Radio Observatory; [2] Kwasan and Hida Observatories, Kyoto-U.

We report coronal features of an active region NOAA 10798. This active region showed 3 M-class, and high speed CMEs, which produced a magnetic storm on 2005 August 24. We examined the coronal features.
