## Development of a method for the classification of sampled groundwater quality

# Mizuno Takashi[1]; Richard Metcalfe[2]; Hideki Mie[1]; Teruki Iwatsuki[1]

[1] JAEA Tono; [2] JNC

JAEA try to construct the quality assessment system of sampled groundwater based on ESL (Evidence Support Logic) software built by Quintessa Japan. The software to assess the ground water quality is TESLA (The Evidence Support Logic Application).
