Development of data analysis server at JAXA/ISAS: network file sharing methods

Iku Shinohara JAXA/ISAS PLAIN center[1]

[1] -

JAXA/ISAS is developing a data analysis server system for space science as well as the database system, DARTS. To achieve seamless data access to the science data from the data analysis system, fast and efficient file sharing method is required. In this paper, we will report results of network file sharing system evaluation.
