## Outreach activities of solid earth science using various kinds of maps

# Hiromichi Tsuji[1]; Hiroshi Tsuruoka[1]

[1] ERI

Maps which represent various kinds of information concerning Earth by geographical location have been a powerful tool for outreach activities of earth science. This paper introduce our recent experiences on outreach activities of solid earth science using 1) a world seismicity map, 2) Google Earth, and 3) a digital elevation map of Tokyo by GSI.
