## The Geoscience Education and the Educational Outreach of Environment and Disaster

# Hiroyuki Ohno[1]

[1] Civil Eng., Nagasaki Univ.

The geoscience education has been sparse at long. This might mean the number of people who can appropriately secure the own safety begins to decrease, for the disaster tending to an increase in recent years. In this paper, the current situation of the geoscience education of the university is shown. And there is a necessity of the information dissemination of the geoscience literacy for the citizens, we need to execute a lot of educational outreach such as Civic Forum.
