Characteristics of fluids discharging active faults

Sachihito Taguchi[1]; Kazuya Shinokura[2]; Tsutomu Hosokawa[2]; Takayuki Uchida[2]; Kazuma Hishikawa[2]

[1] Earth System Science, Fukuoka Univ; [2] Earth System Science, Fukuoka Univ.

We will refer to the fluid chemistries and characteristics of hot spring waters discharged from Kego fault and Minawa fault in Fukuoka Prefecture. Dynamic migration of water along the faults will be mentioned.
