Over 220,000 people died by 2004 Sumatra tsunami. We have to learn the actual situation of this disaster, and it is necessary for people in the world to prepare for a huge tsunami. Many video cameras had taken the moment of this tsunami, but the almost films were recorded in inland area. A states of tsunami suffering near shorelines were not recorded in these movies. There were left only in memory of the persons. In November, 2006, we interviewed with the 22 victims of the tsunami in Banda Aceh, Indonesia. We made 16 pictures of their experience obtained by this interview, too. We are forwarding making of the teaching materials which based on these interviews and pictures.
