Geopark project for Paleolithic obsidian stoneware sites and Periglacial relics in Shirataki, Hokkaido

Shunichi Kamewada[1]

[1] G.P.P.S.

<http://www16.ocn.ne.jp/~srk-gp/>

Shirataki district is located in middle-east of Hokkaido and is well known as the large scale of Pliocene obsidian rock body and many of Paleolithic stoneware sites based on those obsidian. This area is also known as existence of

Periglacial relics with beautiful landscapes of mountain area. G.P.P.S is working for this area to be one of Japanese geopark sites
