Temporal strong motion observation of aftershocks of the 2007 Noto Peninsula earthquake

Masayuki Yoshimi[1]; Kunikazu Yoshida[1]; Hidetaka Saomoto[1]; Ikuo Cho[2]

[1] Active Fault Research Center, AIST, GSJ; [2] AIST

We conducted temporal strong motion observation of aftershock of the 2007 Noto Peninsula earthquake. We installed eight accelerographs in the affected areas, Anamizu, central Wajima, and Monzen area of Wajima.
