

Management of Standard Format Data on G-INDEX

Daisaku Kawabata[1]; Yasuaki Murata[2]

[1] Geoscience and Technology, AIST; [2] GSJ, AIST

G-INDEX is one of our major databases searching system in GSJ, AIST. G-INDEX's major functions are (1) searching databases based on text and based on WebGIS; 2) presentation of the databases by each layer; 3) search files in those databases; 4) connect the original database system and analysis using the original database system; (5) download the data. G-INDEX will support GML and GeoSciML in future.
