

## How we make the best use of hazard maps? -improvement of reality of hazard maps-

# Hiroshi Une[1]; Mamoru Koarai[1]; Yasuhiro Suzuki[2]

[1] GSI; [2] Nagoya Univ.

### 1. History and present conditions of hazard maps

- (1) hazard maps for volcanoes
- (2) hazard maps for floodings
- (3) hazard maps for earthquakes
- (4) hazard maps for sediment disaster

### 2. How we make the best use of hazard maps

- (1) improve the resolution of hazard maps
- (2) construct 'society with disaster literacy', where citizens recognize their own disaster hazards
- (3) educate children that the basis of disaster prevention is to understand the nature and the region
