Germination under Extreme Hypobaric and Hypoxic Condition

Hirofumi Hashimoto[1]

[1] JAXA

http://www.isas.ac.jp/j/about/professor/h/hashimoto_hirofumi.shtml

In order to investigate a possibility of plant cultivation for the space agriculture on Mars, germination and amount of oxygen under extreme hypobaric and hypoxic condition was measured. Initial condition of oxygen partial pressure is 1kPa which is equal to 1/100 of normal earth atmosphere.
