## **Biogeosciences: Earth and planetary sciences approaching with biological point of view**

# Hiroshi Kitazato[1]

[1] IFREE, JAMSTEC

”Biogeoscience” is a new research field of Earth and Planetary Science. When we overview history of the Earth and planets, biological processes are one of important components for understanding their evolutions. I plan to talk about general scope of ”Biogeoscience” in relation to history of the Earth and Life.
