## Relationship between non-absorbed applied nitrogen and T-N conc. of river water, and NO<sub>3</sub>-N conc. of shallow groundwater

Seiko Yoshikawa<sup>1\*</sup>, Hidehiro Takahashi<sup>1</sup>, Yasuko Sasada<sup>2</sup>, Yuta Shimizu<sup>3</sup>, Shin-ichi Onodera<sup>4</sup>

<sup>1</sup>WeNARC, <sup>2</sup>Kagawa Pref. Res. Inst for Environ. etc, <sup>3</sup>Graduate school, Hiroshima Univ.,

<sup>4</sup>Integrated Sci., Hiroshima Univ.

Non-absorbed applied nitrogen and T-N conc. of river water, and NO<sub>3</sub>-N conc. of shallow groundwater were correlated respectively for watersheds in Kagawa.

Keywords: watershed, non-absorbed applied nitrogen, total nitrogen, nitrate nitrogen, shallow groundwater
