## Paleo-environmental Reconstruction at Khentii Mountain and surroundings, north-central Mongolia

Kaoru Kashima<sup>1\*</sup>, A. Orkhonselenge<sup>2</sup>, Yu Fukumoto<sup>1</sup>, Wonsuh Song<sup>3</sup>

<sup>1</sup>Kyushu University, <sup>2</sup>Institute of Geography, Mongolian Acade, <sup>3</sup>National Institute for Materials Science

Institute of Geography, Mongolian Academy of Sciences, and Kyushu University took the agreement in 2009 for the international co-operative research for the long-term (100-1000 years) environmental reconstruction in Mongolia. The surveys would reveal the important new climatic epoch to presume future environmental changes.

Keywords: Quaternary, Climatic change, Desertification, Peat land, Lake deposit, Mongolia
