The examples of risk communication using Underground Visualization System

Hidemasa Ohta^{1*}

¹Ohta Geo-Research Co., Ltd.

The ground disaster becomes cause by the basement which a human being cannot look at easily in many cases. Therefore it is hard to extremely understand for the nonspecialist. I used 3-Dimensional Visualization System for the solution of difficult problems in the risk communication. I introduce the example that I nominated result for.

Keywords: 3-Dimensional Visualization System, risk communication, Easy understanding
