Landscape visualization of geopark

Keiichi Katsube^{1*}, Haku Doi¹, Go Ishikawa², Kuniyasu Mokudai³

¹Hokkaido Chizu Co. Ltd., ²Tokyo Map Reserch Co. Ltd., ³PN Foundation

Existing publicity works for geopark focused on their characteristic rocks, geological layers, or special events like volcanic activity. But we have tried to represent "landscape" of geopark by using GIS datum and cartographic methods. The bird's-eye view of geopark is effective for comprehensive understandings of their uniqueness.

Keywords: geopark, GIS, landscape
