## Current status of post Hayabusa mission

Makoto Yoshikawa<sup>1\*</sup>

<sup>1</sup>JAXA

Asteroid sample return mission Hayabusa is now coming to its end. It will come back to the earth in June of this year (2010). It took seven years in total. And we have been also considering post Hayabusa missions for about 10 years. In this presentation, we will summarize these new missions for asteroid sample return.

Keywords: Asteroid, Exploration, Sample Return, Hayabusa Mission
