Strategy of small objects mission to understand origin of solar system

Hisayoshi Yurimoto^{1*}

¹Hokkaido Univ.

Samples from an asteroid Itokawa will be returned by Hayabusa mission on June, 2010. Science missions beyond Hayabusa is ongoing. The goal of small object missions is to understand of origin of solar system. The mission will provide archived records in materials from interstellar phenomena to asteroid accretion. We will discuss how to decode the records.
