## Concerns and knowledge of primary school teacher education students about global warming

Miho Yamamori<sup>1\*</sup>, Kanako Kyochi<sup>1</sup>

<sup>1</sup>Tsuru University

We will report a questionnaire survey result of concerns and knowledge of primary school teacher education students about global warming. The answers were obtained from 146 students. Most of the students had concerns about global warming. However, the percentage of the students who answered that they knew the green house effect of the Earth's atmosphere was 57 %.

Keywords: global warming, science in primary school, primary school teacher training
