## Slope failures associated with thrusting, application of analogue modeling to submarine landslides

Yasuhiro Yamada<sup>1\*</sup>, Yoshihiko Yamashita<sup>1</sup>, Yuzuru Yamamoto<sup>2</sup>

<sup>1</sup>Kyoto University, <sup>2</sup>JAMSTEC

Our analogue models suggest that slope failures can be classified into two and may be caused by steepening of the slope by underlying fault activity. This presentation explains a possible mechanism of such failures.

Keywords: slope failure, analogue model, thrusting
