Earth Science Education using "Mt Fuji Travelling Exhibition"

Toshio Sasada^{1*}, Akira Miyake²

¹STEP, Aichi University of Education, ²Science., Aichi University of Education

Mount Fuji is one of the famous volcanoes in Japan and it is a good theme for learning about Earth Sciences. We opened the exhibition of Mt. Fuji at Aichi University of Education in April 2010. In the exhibition we displayed items of "Mt. Fuji travelling exhibition" co-produced by Shizuoka University and National Museum of Nature and Science. We also displayed some products by our university, including a 3D-map of Mt. Fuji, and held special lectures about Mt. Fuji for the public.

In this poster, we will show one of the exhibits (3D-map of Mt. Fuji) and report the response of the exhibition visitors.

Keywords: Mount Fuji, Education, Earth Science, Travelling Exhibition
