Production of "The guide book of the earth science in the Hino area" by the earth science club of Hino high school

Itoko Tamura^{1*}

¹Tokyo met. Hino high school / Geog. TMU

Japan Science and Technology Agency (JST) have begun The science club activity advancement project of junior high school and high school students (SCAAP) to make the youth's science club activities active.

The earth science club of Tokyo metropolitan Hino high school will make "The guide book of the earth science in the Hino area" by this support.

The guide book consists of five items like the sky observation, geographical features, geological features, the rivers and the weather of the Hino area.

The earth science club member of high school can acquire various knowledge of Earth science by the process of the production of the guide book. And this project aims to foster the attitude for which the earth science club member of high school searches in a scientific manner.

Keywords: high school, earth science club, guide book of earth science, Hino area, natural history, JST
