Study on the interest and teaching effect about earth science

Haruka Matsuoka^{1*}, Mikiya Yamashita², Takeshi Uemura³

¹Tsukuba Gakuin University, ²JAMSTEC, ³Kaijo Junior and Senior High school

To reveal the understanding of earth science, the questionnaire survey is carried out for university student to make a specialty of information science in Tsukuba Gakuin University during the first term of 2010. According to the result of this survey, it is clear that most member of our class has strong interests for natural science and environment problem. Although they can understand that the usual living condition is affected for earth event such as global warming, they have no idea for the way to change that situation for future environment. This study is contributed the improvement of general society through the understanding of earth science in university students.
