Application of Seismic Hazard Map in Chiba prefecture

Kazumi Asao^{1*}

¹Chiba Prefecture

Chiba Prefecture published seismic hazard maps in 2008, and developed an open web system, named Earthquake Damage Estimation in Chiba (<http://www.bousai.pref.chiba.lg.jp/portal/higaisoutei/index.html>), in 2009. This web system provided not only the hazard maps, but also the date of making the hazard maps and underground geological structure.
