Mineral resources database of East Asia area

Tetsuji Ohno^{1*}, Masaharu KAMITANI¹, Kimio OKUMURA¹, Yoji TERAOKA¹, Sumiko Miyano¹, Yasusi WATANABE¹

¹AIST

The mineral resources map of East Asia (Kamitani et al., 2007) shows land area deposits of main metallic mineral and non-metallic mineral resources, except for construction materials. About 3,200 mineral deposits are shown on the map regardless of their status of exploration, exploitation and mined out.

The background geology of the Mineral Resources Map was adopted from the Geological Map of East Asia (Teraoka et al., 2003).

All deposit data are published as Excel file format. However, anyone is said to want a more accessible file formats. Therefore, we are considering publishing data by other forms such as svg or pdf.
