Time:May 22 09:00-09:15

Development of the field of biogeochemistry in the world as well as in Japan

Keiichiro Fuwa^{1*}

¹none

The field of biogeochemistry was developed, first, by the great Russian scientist V.I. Vernadsky with the relationships to his philosophical discussion on the biosphere.

This interesting field, which is closely related nowadays environmental chemistry, has been succeeded by many geochemists in the world including Japanese scientists such as Profs J. Takahashi, Y. Shibata, Y. Miyake et al..
