This presentation is to provide a preliminary report on the tsunami of Chiba prefecture Sammu city due to the 2011 off the Pacific coast of Tohoku earthquake.

Sammu city is a city with the main seaside resort in the Hasunuma beach as for the corner of the Kujukuri coast.

One dead and 35 households in the house are completely destroyed in this city. The tsunami goes back the river and the waterway, and has caused the damage of the house destruction with the flood by the overtopping. This report looks at the realities of the flood on the coastal area, and the method of confirming the attainment point and the maximum height.

Keywords: The 2011 off the Pacific coast of Tohoku earthquake, Chiba prefecture, Sammu city, Tsunami, Tsunami attainment point, damage
