HDTV observation from International Space Station

Hideaki Shinohara¹, Keiji Murakami¹, Makoto Suzuki^{1*}

¹JAXA

A high resolution camera (HDTV) as an instrument of ISS/JEM/MCE has been developed from COTS high vision camera. This camera will be launched by HTV-3 and will operate on the ISS in Jan. 2012. This paper will introduce the development of MCE/HDTV and its observation plan.

Keywords: HDTV, ISS
