MSD004-15

Room:301A

Time:May 27 18:00-18:15

## The present status of the small scientific satellite: ELMOS Constellation

Tetsuya Kodama<sup>1\*</sup>, Makoto Suzuki<sup>1</sup>, Koichiro Oyama<sup>2</sup>, Takuji Ebinuma<sup>3</sup>

<sup>1</sup>Japan Aerospace Exploration Agency, <sup>2</sup>National Cheng Kung University, <sup>3</sup>The University of Tokyo

The ELMOS constellation is composed of 200kg-class small satellite and four or five microsattellites. All the satellites carry GPS occultation receiver, impedance probe and electron temperature probe. Its main objective is to observe time-space variation of physical values of the ionosphere-atmosphere region.

Keywords: small scientific satellite, ELMOS, constellation, GPS occultation, ionosphere, seismo-electromagnetic
