Development of Papercraft 3-dimentional map

Hideaki Matsumoto^{1*}, Takuya Suzuki¹, Takeshi Nishida¹

¹Hokkaido Chizu Co. Ltd.,

We developed the method of making Papercraft 3-dimentional map from detailed topographic model (Triangle Irregular Network: TIN).

This Papercraft maps are represent real landscapes and available for educational purposes. The processes of putting the Papercraft together are helpful in understanding characteristic landforms such as Geopark or other natural parks.

Keywords: Papercraft, 3-dimentional map, landscape
