VLBI2010 and GGOS

Shinobu Kurihara^{1*}, Jiro Kuroda¹, Misao Ishihara¹, Kensuke Kokado¹, Ryoji Kawabata¹

¹GSI of Japan

The International VLBI Service for Geodesy and Astrometry (IVS) had been considering the next generation VLBI system named "VLBI2010". The IVS approved the specification of the VLBI2010 system in the IVS General Meeting held in France in March 2009, and the member organization of IVS proceeded in working toward VLBI2010. VLBI2010 is necessary for the Global Geodetic Observation System (GGOS) proceeded with the International Association of Geodesy. In this report, I'll talk about the outline of VLBI2010, the situation of the effort for VLBI2010 in the world and the relationship with GGOS.

Keywords: VLBI, VLBI2010, IVS, Global, IAG, GGOS
