Lessons learned from the career of Prof. A. Imamura for the earthquake disaster prevention

Masayuki Takemura^{1*}

¹Kobori Reserch Complex INC.

Prof. A. Imamura (1970-1948) is one of the famous Japanese seismologists. He experienced the 1923 Great Kanto earthquake. As a memory of the tenth anniversary, he left a paper in the Journal of Seismological Society of Japan "ZISIN" in 1933. The title is "Retrospection of Great Kanto Earthquake". We reviewed this paper and discussed about social activities of seismologists for the sake of the earthquake disaster prevention on the lessons learned from his career.

Keywords: A. Imamura, Great Kanto Earthquake, ZISIN
