Extreme Weather - From a Sociological Perspective

Isao Nakamura^{1*}

¹Toyo University

In recent years, the disaster information is diversifying, getting more detailed, and sending in real time. The MP Radar provides detailed and real time information.

But often, the results of progresses in disaster information do not be used effectively in the real society.

So, we are looking for the ways to use MP radar effectively through some social experiments. The experiments are proceeded in some autonomies, railway company, construction company, high school, and among the general public.

Keywords: weather, MP Radar, social experiment
