We observed ground- gasses and water quality in a borehole of Fast breeder reactor research and development center Monju, Fukui prefecture. The purpose of this observation was to investigate a connection between groundwater and oceanwater. This observation was started from 23th November 2011, and will be finished to late February 2012. We will issue the result of this observation.

Keywords: Ground water data analyzing system, GROWDAS, groundwater quality, groundgasses
